

APC Charge-UPS

Industry's first and only complete UPS refresh package

Compatibility – Convenience – Investment Protection – Peace of Mind

APC Charge-UPS

APC™ Charge-UPS provides the industry's first total refresh package, which optimizes the value of your existing APC solution by restoring the UPS to the original specifications and extending the warranty on your UPS

- 1 year warranty on entire UPS system with overnight replacement if a problem occurs
- Genuine APC RBC™ with 1 year warranty
- Pre-paid return freight for spent battery

Reasons you should only use a genuine APC RBC™ in your APC UPS

- Use of a non-APC battery may result in lower run time, damage the UPS, or void safety certifications on the UPS
- Use of non-APC battery will void APC's Equipment Protection Policy
- APC protects the environment by recycling used batteries
- APC supplies the appropriate instructions for your UPS, along with any needed wires and connectors.
